B_005: Key View Update After Key Deletion	3
Changes in Setup Requirements	3
R_001: GnuPG version 2.5.18 or later – automatically installed if required.	3

Version 8.7.1

Bugfixes

B_001: Sending Test Emails

Description of Bugfix:

Fixed an issue affecting the sending of test emails.

B_002: Access to License Management

Description of Bugfix:

License Management is now accessible again via the Help menu.

B_003: Key View Update After Key Deletion

Description of Bugfix:

The key view is now updated correctly after deleting a key. This prevents repeated deletion attempts for keys that have already been deleted.

B_004: Key View Update After Key Deletion

Description of Bugfix:

Newly generated or modified keys are now uploaded automatically when using the Configuration Wizard.

B_005: Key View Update After Key Deletion

Description of Bugfix:

Fixed an issue that prevented emails marked as "Private" from being decrypted and displayed in additional mailboxes.

Changes in Setup Requirements

R_001: GnuPG version 2.5.18 or later – automatically installed if required.
